

Stone, GRC & Precast Support & Restraint Brackets

Stainless UK manufactures stainless steel support brackets, restraint brackets, fixing plates and fabricated components for use within stone cladding, GRC (Glass Reinforced Concrete), GFRC and precast concrete facade systems.

Working from customer drawings and specifications, we supply precision-manufactured stainless steel components for facade contractors, stone specialists, precast manufacturers, fabricators and construction projects throughout the UK.

Manufactured in Grade 304 and Grade 316 stainless steel, our products provide the strength, durability and corrosion resistance required for demanding building and infrastructure applications.

Manufactured to Your Specification

Every project is different. Stainless UK specialises in the manufacture of bespoke stainless steel components produced directly from customer drawings, including:

- Stone support brackets
- Stone restraint brackets
- GRC support brackets
- Precast panel brackets
- Connection plates
- Support angles
- Cleats and fixing plates
- Shim plates
- Fabricated stainless steel assemblies
- Custom laser-cut and folded components

Whether you require a single prototype or a large production batch, we can manufacture components to your stated drawings and requirements.

Materials

Grade 304 Stainless Steel

Suitable for many internal and external construction applications, subject to the customer's specification and the requirements of the project.

Grade 316 Stainless Steel

Offers enhanced corrosion resistance and is commonly specified for exposed environments, coastal locations and demanding infrastructure projects.

Material certification can be supplied where required.

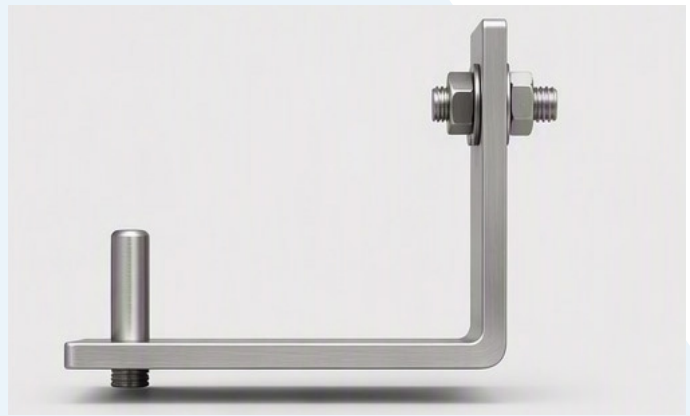

Typical Applications

Natural Stone Cladding

Support and restraint brackets used within stone facade systems.

GRC & GFRC Panels

Stainless steel support components manufactured for architectural facade projects.

Precast Concrete Panels

Load-transfer brackets, fixing plates and associated fabricated components.

Building Facades

Bespoke stainless steel fabrications used within commercial, residential and public-sector developments.

Infrastructure Projects

Manufactured stainless steel components for rail, highways, tunnels, bridges and major infrastructure schemes.

Send us your drawings and project requirements for quotation.
