

Grip-Plate

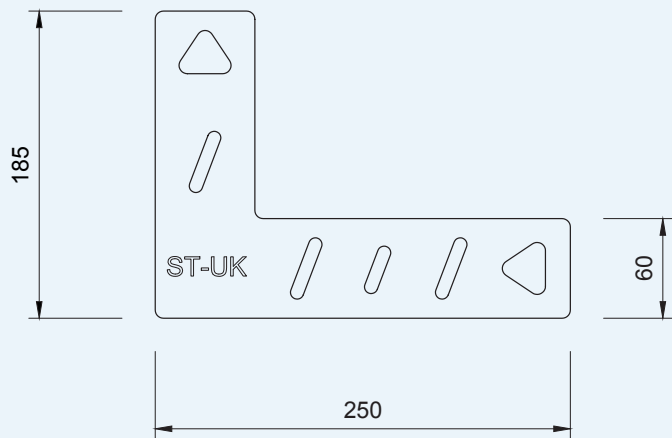

The SUK Grip-Plate is a reveal support plate, designed to provide support to the initial courses of brickwork at the window reveals. Grip plate to suit 215 mm reveal or 327 mm reveal.

Specification

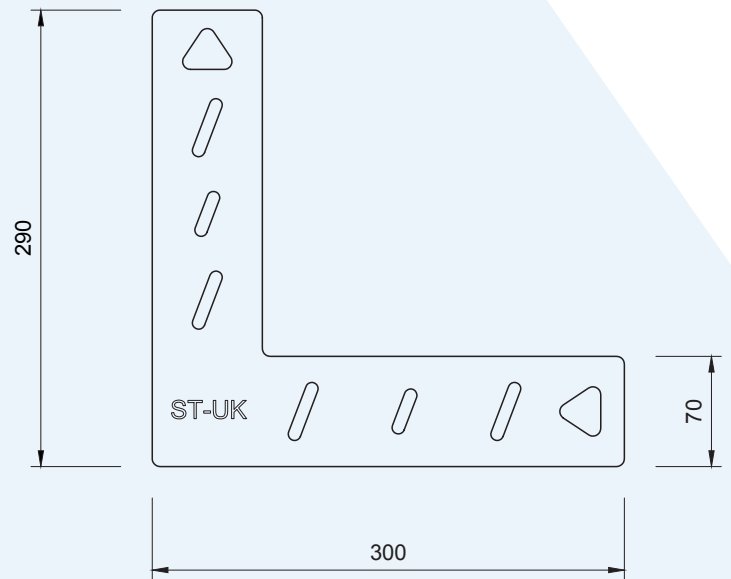

- Manufactured from grade 304 stainless steel.
- Reaction to fire – Non-Combustible (as defined in the building regulations)
- Durability – Excellent corrosion resistance
- Various other sizes available upon request

Dimensions: ST-UK GP215

ST-UK GP327

To ensure the integrity of the Grip-Plate, it is important to build the outer leaf a minimum of one course on top of the Grip-Plate before installing the brick reveal.

This additional component is positioned nicely within the bed-joint and uses our expertly lasered slots to key into the mortar bed. This provides a bond between the outer leaf and the reveal.
