

Flanged, Capped, Stopped & Plain Dowel Pins

Flanged, Capped & Stopped Dowels

Flanged, capped and stopped dowels are typically used in conjunction with masonry support brackets to provide restraint to masonry, preventing lateral movement due to wind loads. The flange / cap controls how far the dowel protrudes either side of the bracket it is fitted to.

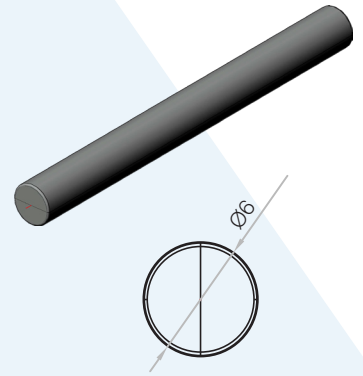

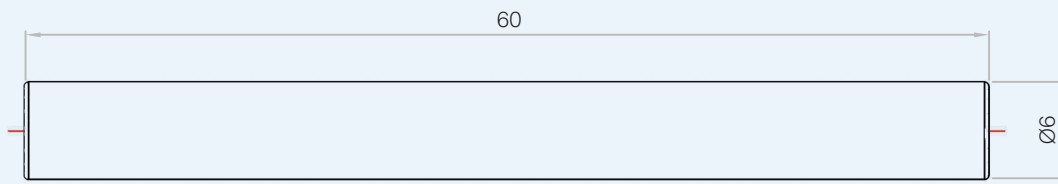

Plain Dowels

Plain dowels offer a versatile and cost-effective alternative, supplied cut to length and suitable for welding to brackets or restraints if required. Diameters and lengths can be manufactured to suit project requirements.

Plain Dowel Pin 6 Dia. × 60 Long

Material: Stainless Steel – A2-70

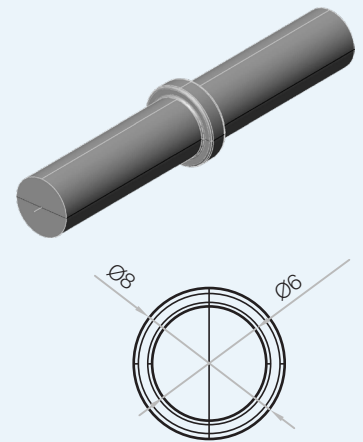

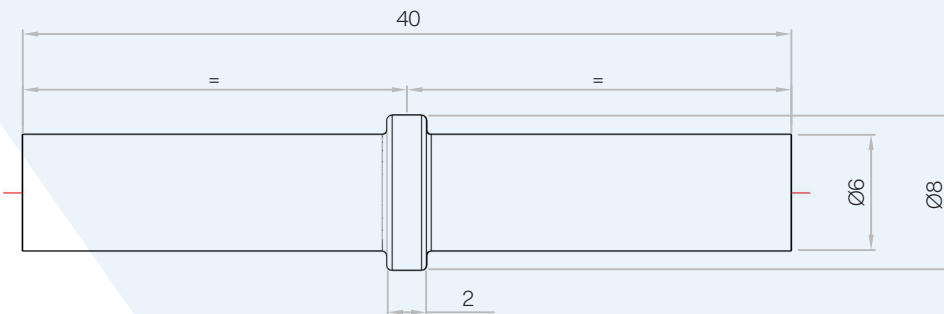

Approx Weight (each): 0.01357 kg

Flanged Dowel Pin 6 Dia. × 40 Long

Material: Stainless Steel – A2-70

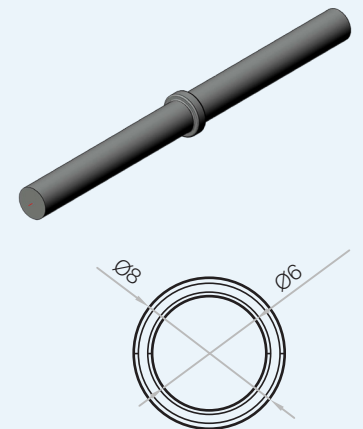

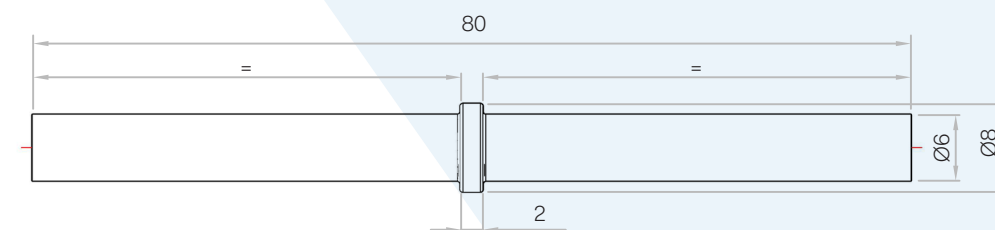

Approx Weight (each): 0.00940 kg

Flanged Dowel Pin 6 Dia. × 80 Long

Material: Stainless Steel – A2-70

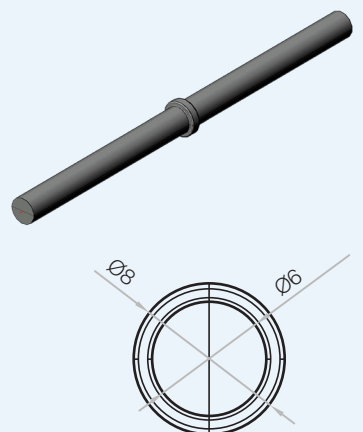

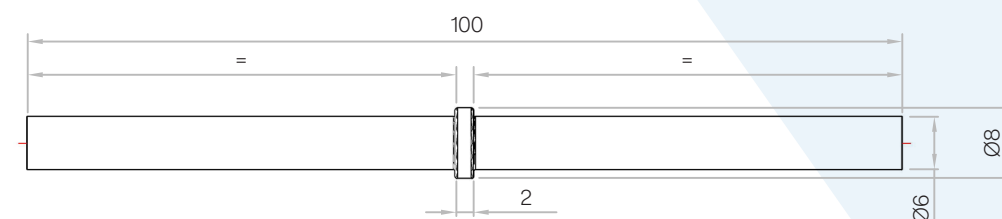

Approx Weight (each): 0.01845 kg

Flanged Dowel Pin 6 Dia. × 100 Long

Material: Stainless Steel – A2-70

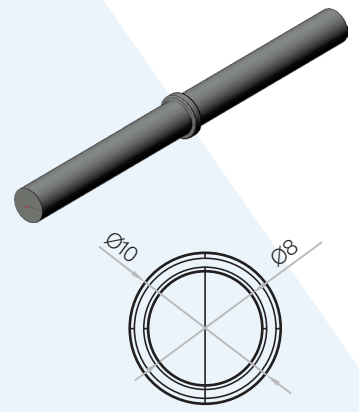

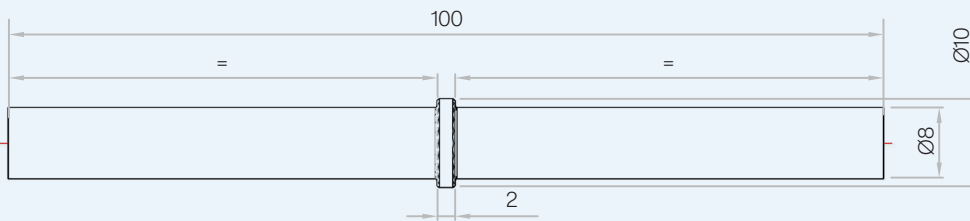

Approx Weight (each): 0.02297 kg

Flanged Dowel Pin 8 Dia. × 100 Long

Material: Stainless Steel – A2-70

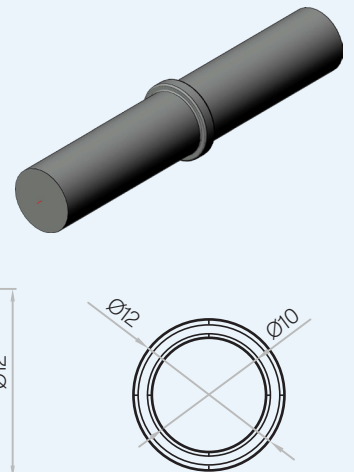

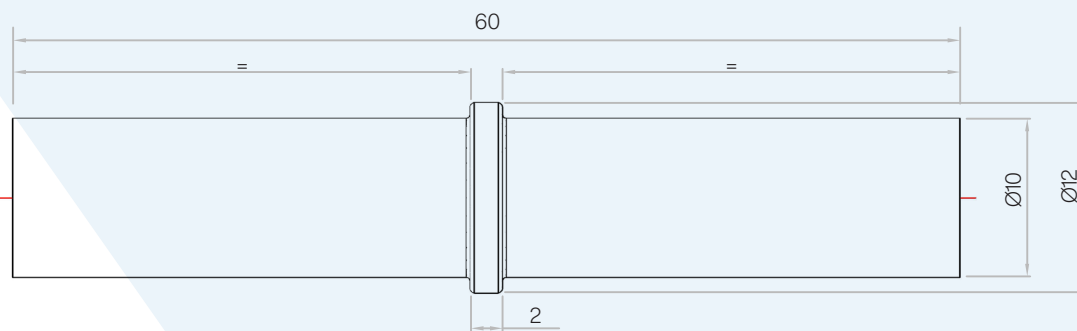

Approx Weight (each): 0.04066 kg

Flanged Dowel Pin 10 Dia. × 60 Long

Material: Stainless Steel – A2-70

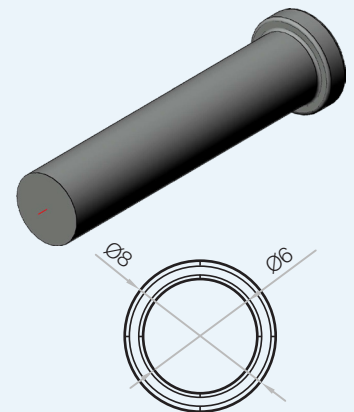

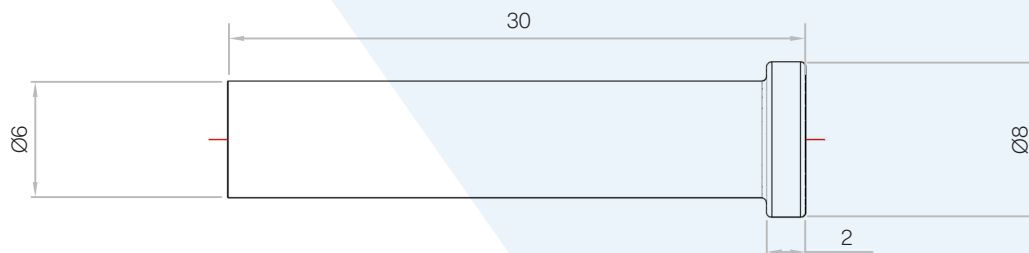

Approx Weight (each): 0.03825 kg

Capped Dowel Pin 6 Dia. × 30 Long

Material: Stainless Steel – A2-70

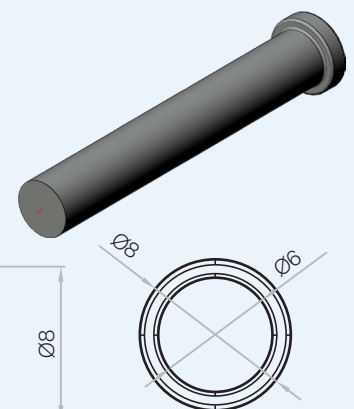

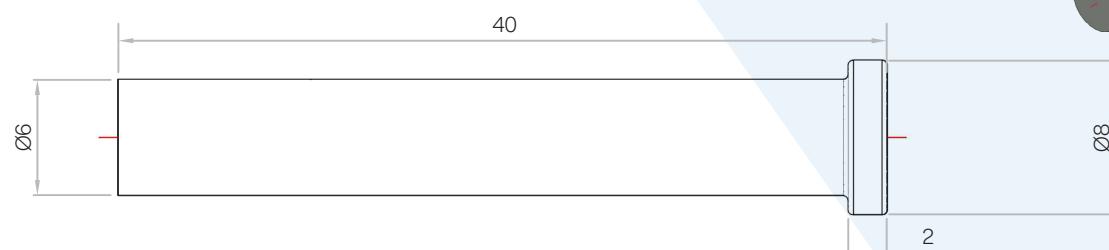

Approx Weight (each): 0.00713 kg

Capped Dowel Pin 6 Dia. × 40 Long

Material: Stainless Steel – A2-70

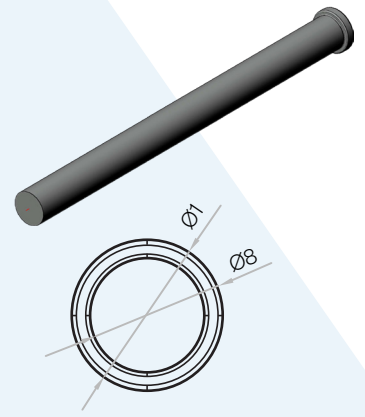

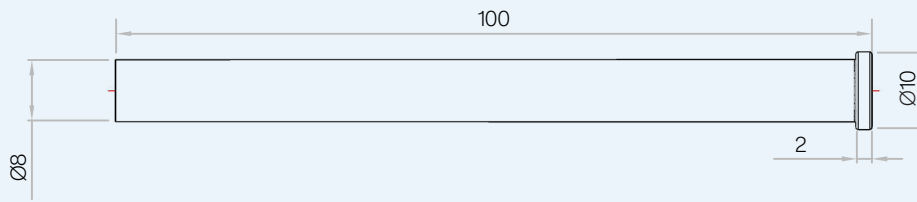

Approx Weight (each): 0.00940 kg

Capped Dowel Pin 8 Dia × 100 Long

Material: Stainless Steel – A2-70

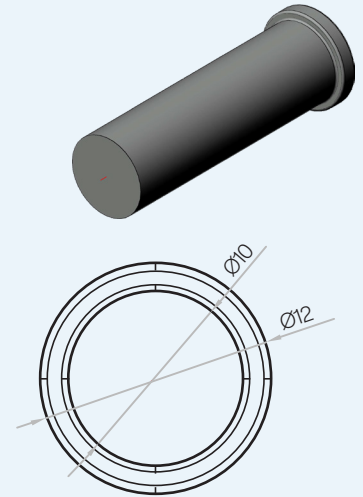

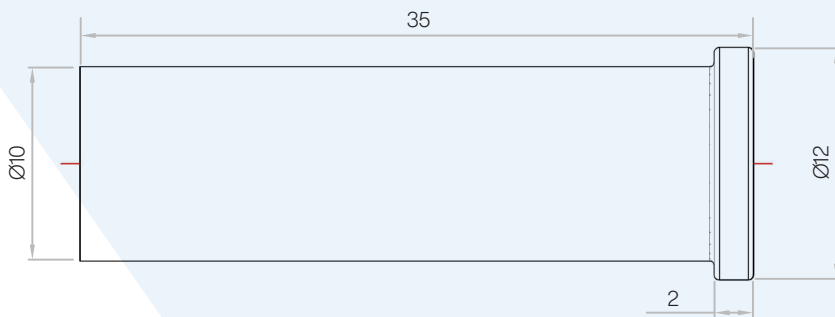

Approx Weight (each): 0.04066 kg

Capped Dowel Pin 10 Dia. × 35 Long

Material: Stainless Steel – A2-70

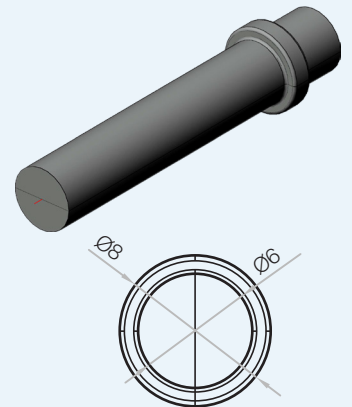

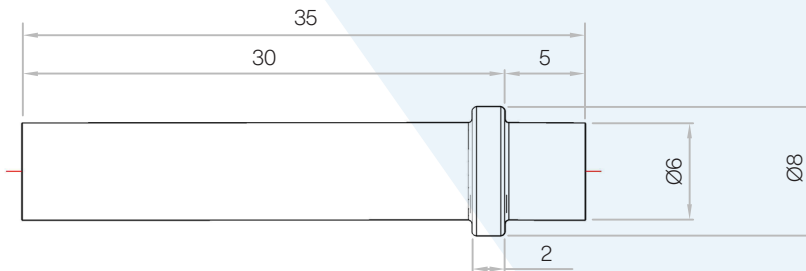

Approx Weight (each): 0.02254 kg

Stopped Dowel Pin 6 Dia. × 35 Long

Material: Stainless Steel – A2-70

Approx Weight (each): 0.00827 kg

Stopped Dowel Pin 6 Dia. × 45 Long

Material: Stainless Steel – A2-70

Approx Weight (each): 0.01053 kg
