

Stainless UK Limited
Newhall Road Works · Sheffield · S9 2QL

Environmental Policy

Stainless UK Ltd manufactures and stocks stainless steel products for civil engineering, geotechnical engineering and heat and corrosion resistant applications. Products are supplied worldwide but predominantly in UK and Ireland.

Only a minor environmental impact is generated through these operations and the company recognises its responsibilities to its employees, the general public and the environment.

Stainless steel is a 100% recyclable material and between 60 and 80% of all new stainless steel comes from scrap product. Stainless UK recycles 100% of its stainless steel scrap and so no raw material is wasted when manufacturing products.

The company is committed to the prevention of pollution and compliance with all the relevant environmental legislation and regulation. Stainless UK Ltd works to a system in accordance with BS EN 14001.
